PROFESSIONAL SUMMARY

Software Developer with 1 year of full-time experience building Java and Spring Boot applications, including REST APIs, secure authentication with Spring Security and JWT, and Angular and React front ends. Skilled in MySQL and Oracle SQL, JPA/Hibernate, and Git. Looking for a Software Developer role to build reliable, well-tested, scalable applications.

TECHNICAL SKILLS

Programming Languages: Java
Backend: Spring Boot, and Microservices, REST APIs, JWT Authentication
Frontend: HTML, CSS, JavaScript
Databases: MySQL, Oracle SQL
Tools: Git, GitHub, IntelliJ IDEA, VS Code, Postman,
AI Tools: ChatGPT, Google Gemini, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Trainee | Jagan Technologies | Full-time | Feb 2025 - Mar 2026
Project: Prodigy Genius League, an online assessment platform for CBSE and IIT/NEET aspirants
Environment: Java, Spring Boot, Spring Data JPA, Spring Security, JWT, REST APIs

- Developed a scalable online assessment platform for CBSE and IIT/NEET aspirants using a Java (Spring Boot) backend and an Angular frontend.
- Designed, developed, and tested RESTful APIs with Spring Boot and Spring Data JPA for the user, course, test, and scoring modules.
- Implemented secure authentication and authorization with Spring Security, JWT, and role-based access control (RBAC).
- Tested access rules across different user roles to confirm that each role could reach only its permitted features.
- Verified API request and response behavior, including edge cases, during development to improve reliability.
- Worked with the Angular frontend and Spring Boot backend to deliver the assessment platform's features end to end.

PROJECTS

FoodHub - Food Ordering Application
Technologies: Java, Spring Boot, REST APIs, MySQL, JPA/Hibernate, Postman

- Built RESTful APIs with Spring Boot and implemented CRUD operations to create, retrieve, update, and delete food records.
- Designed and integrated a MySQL database storing food name, category, price, rating, delivery time, image, description, and availability.
- Tested request and response workflows with Postman and integrated the APIs with the frontend to display food data dynamically.
- Migrated food data from static JavaScript files to a database-driven architecture, so newly added items appear in the application automatically.

Digital Memory House
Technologies: React.js, Spring Boot, Java, MySQL, Spring Security, REST APIs, GitHub

- Developed a full-stack memory management application with secure user authentication and OTP-based password recovery.
- Implemented CRUD operations for memories, image uploads, search and filter functionality, and category-wise organization.
- Built RESTful APIs with Spring Boot and integrated a MySQL database using JPA/Hibernate.

EDUCATION

B.Tech, Computer Science | Kallam Haranadhareddy Institute of Technology | 2021 - 2025 | CGPA: 7.9
Intermediate (MPC) | Sri Chaitanya Junior College | 2019 - 2021 | 78%
SSC | City Public School | 2018 - 2019 | CGPA: 9.7

CERTIFICATIONS

- The Joy of Python
